

# Serious Salamande

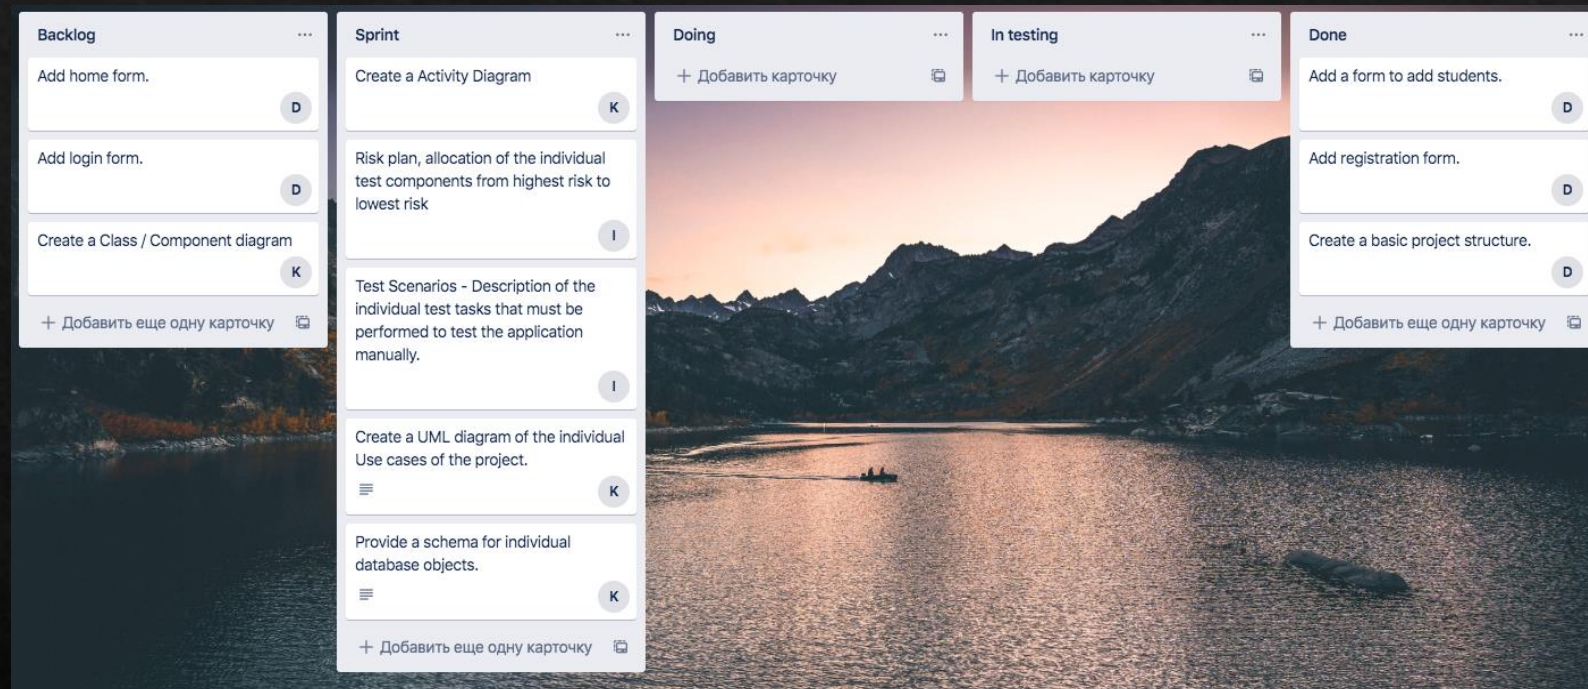

Презентация на работа

# Trello Board

За да организираме работата, използваме Trello.

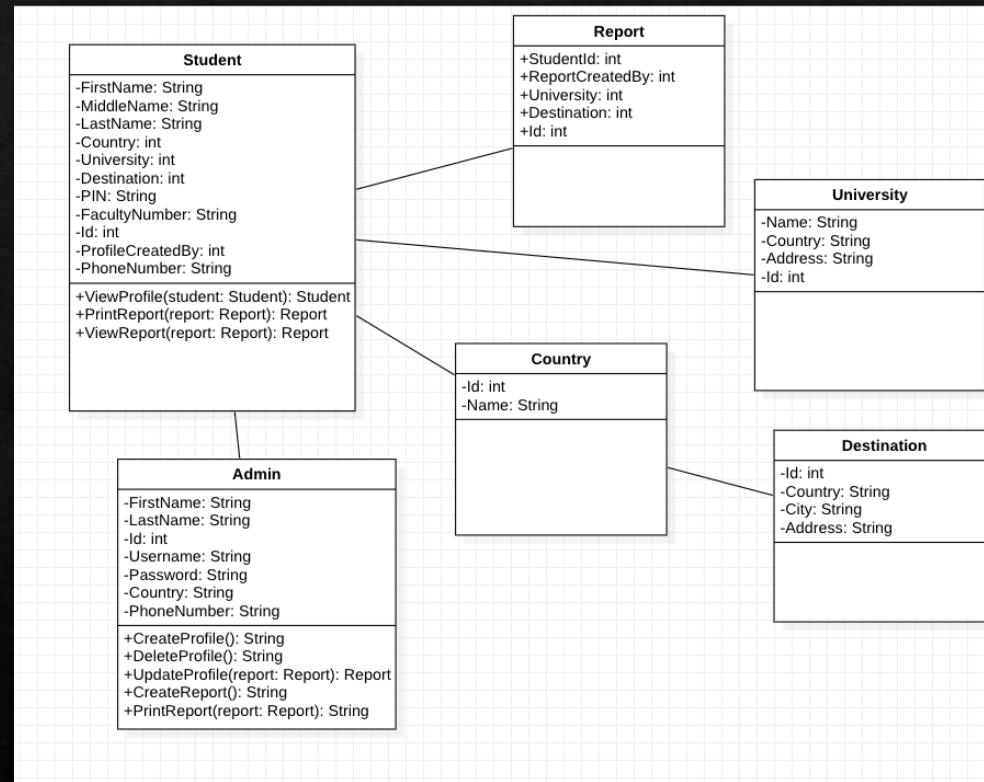

В него създадохме проект и направихме 5 колони (Backlog, Sprint, Doing, In testing, Done).

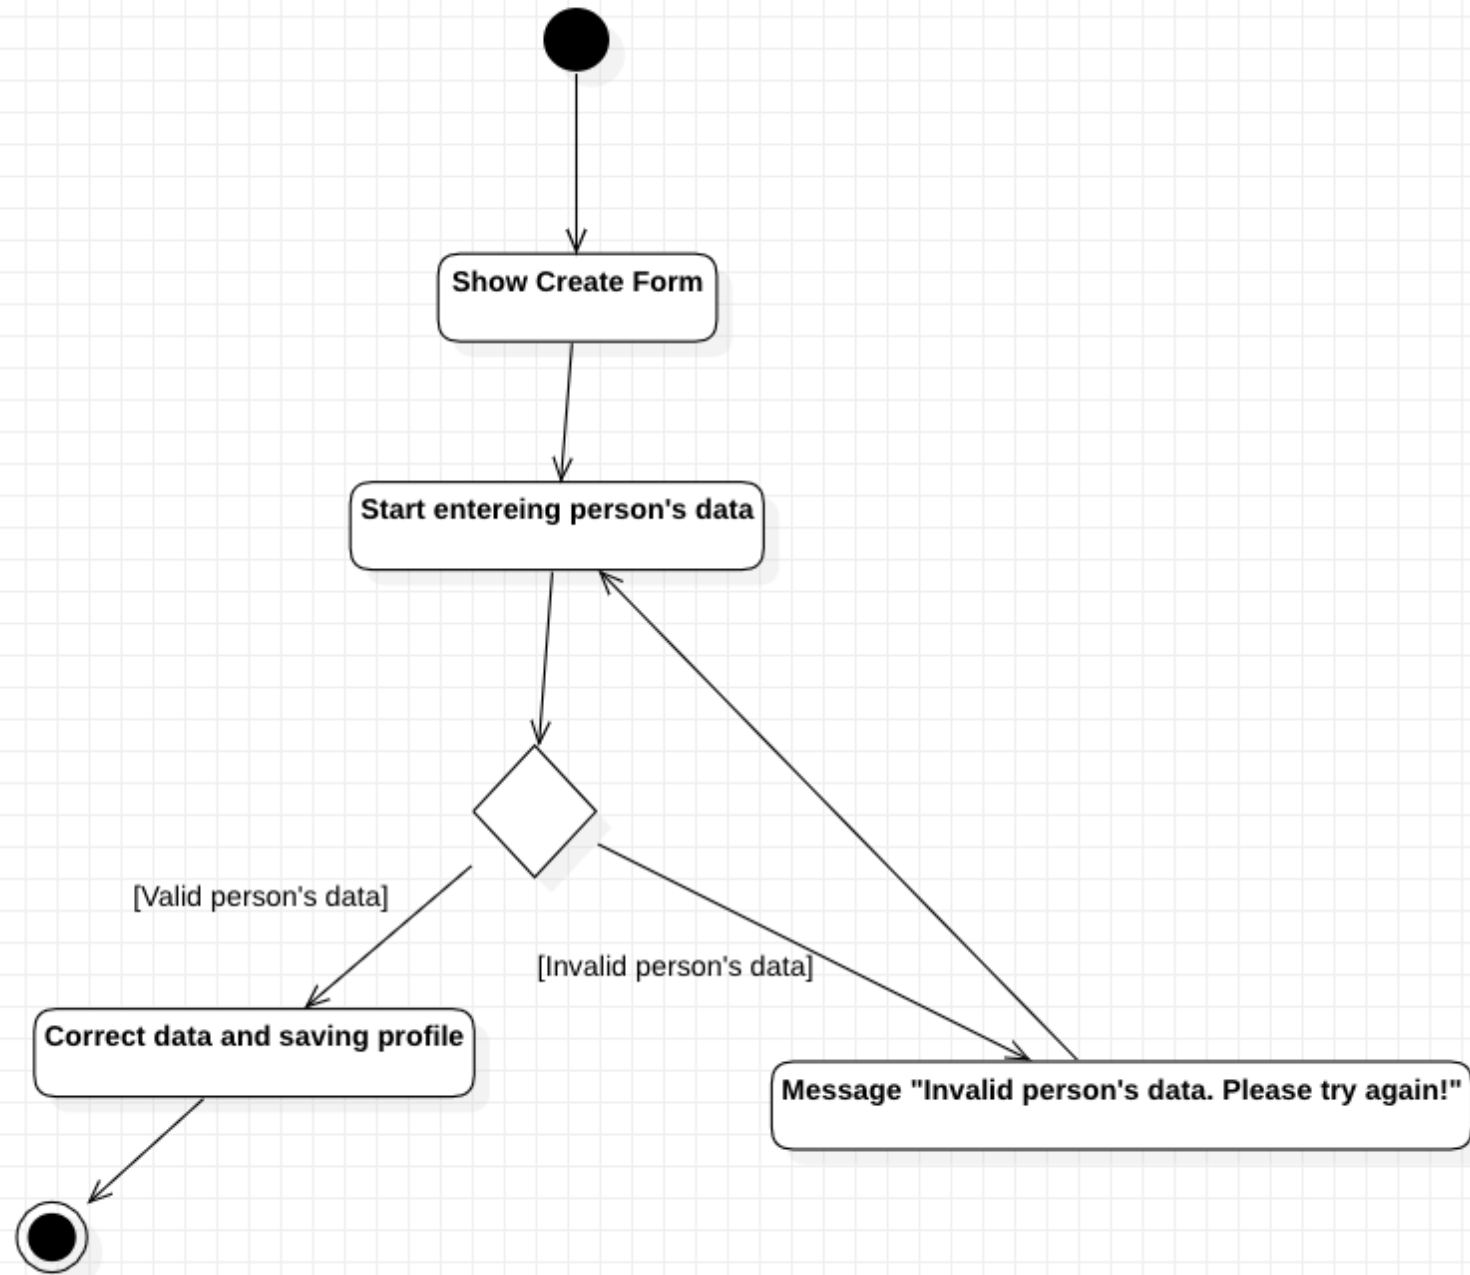

За удобна работа  
направихме няколко  
вида диаграми. Които  
може да се види на  
следващите слайдове.

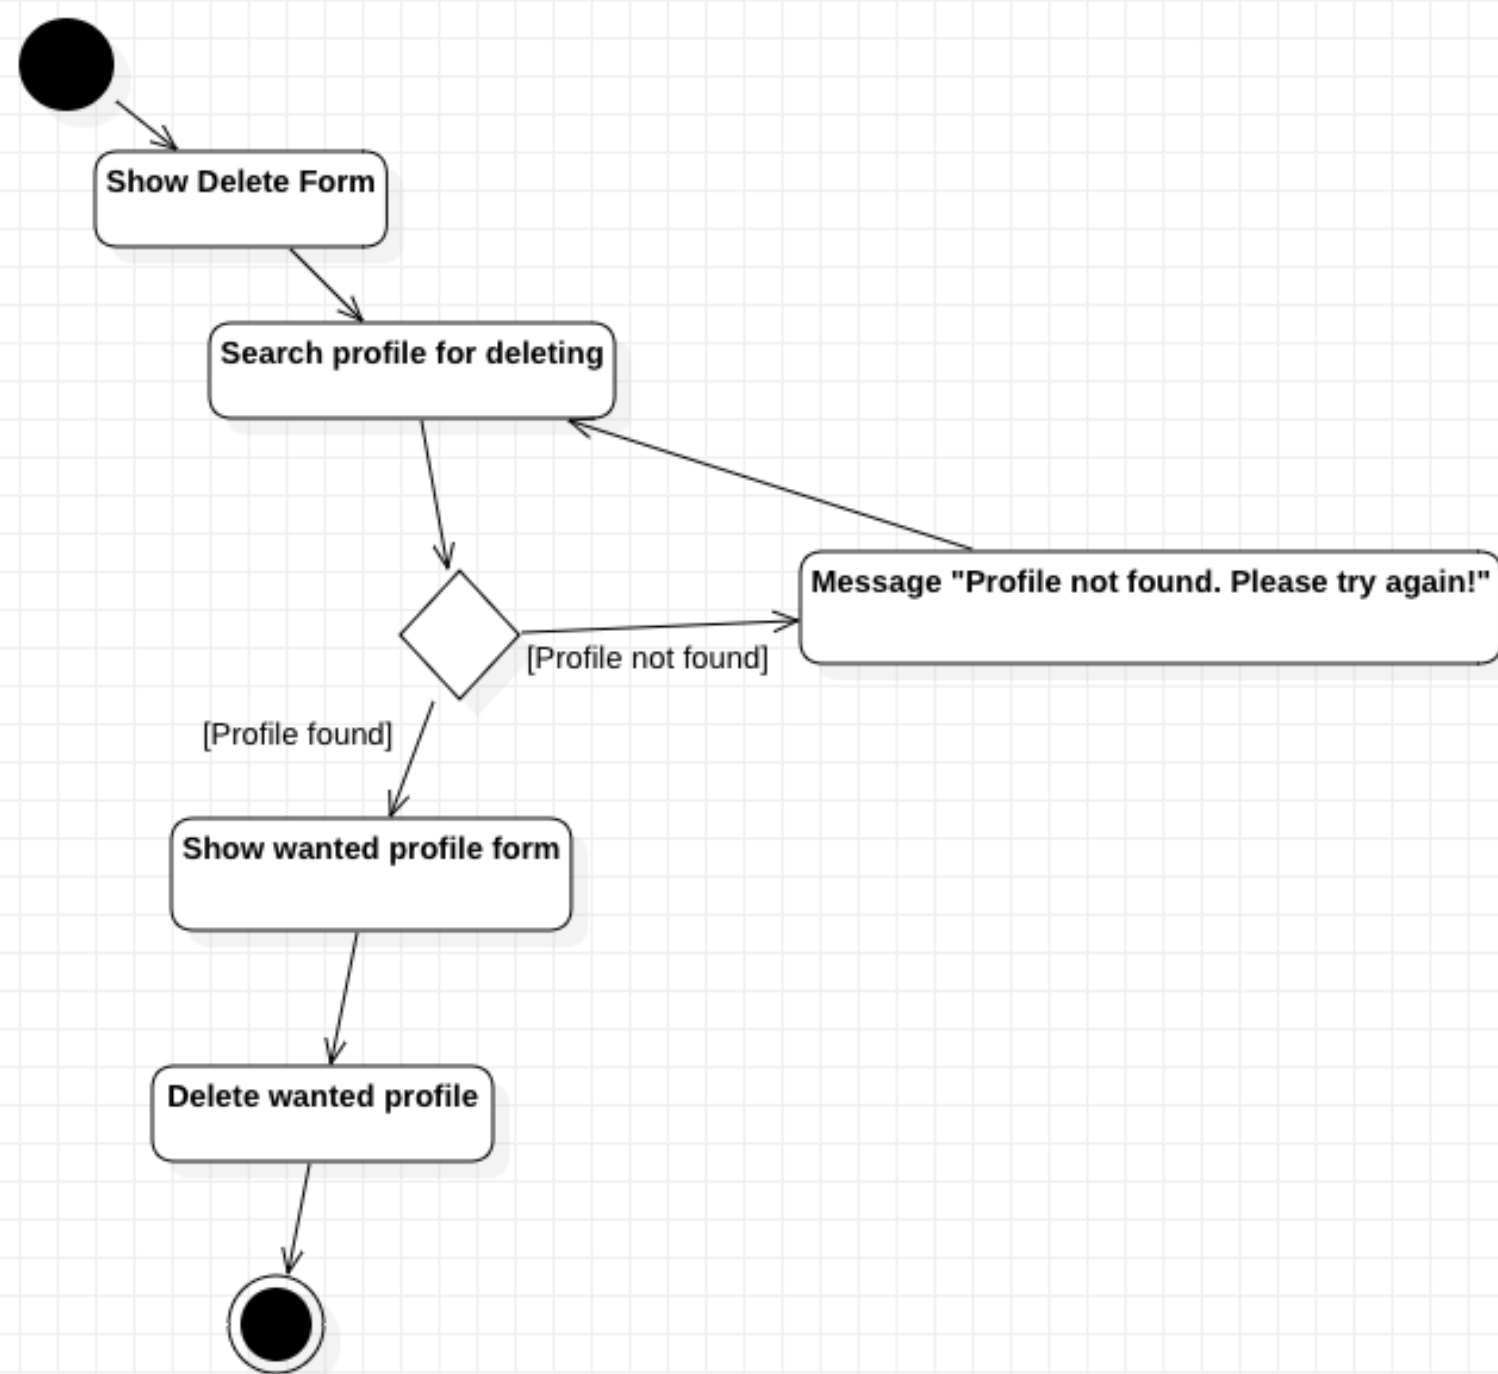

# Class Diagram

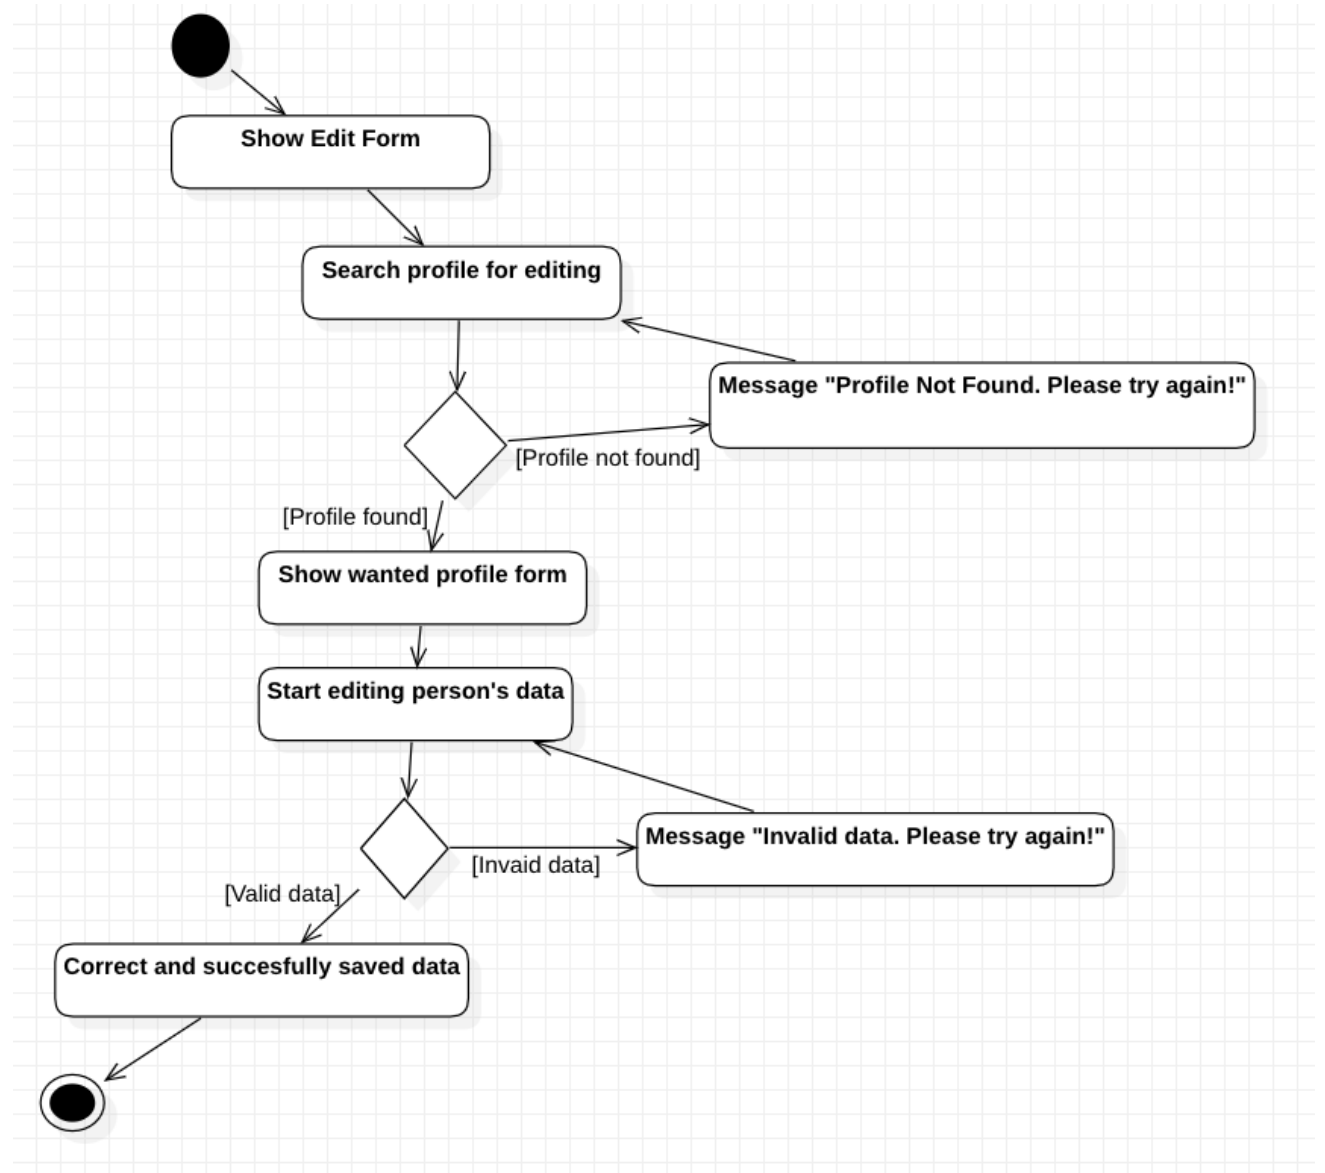

# Activity Diagrams for Create

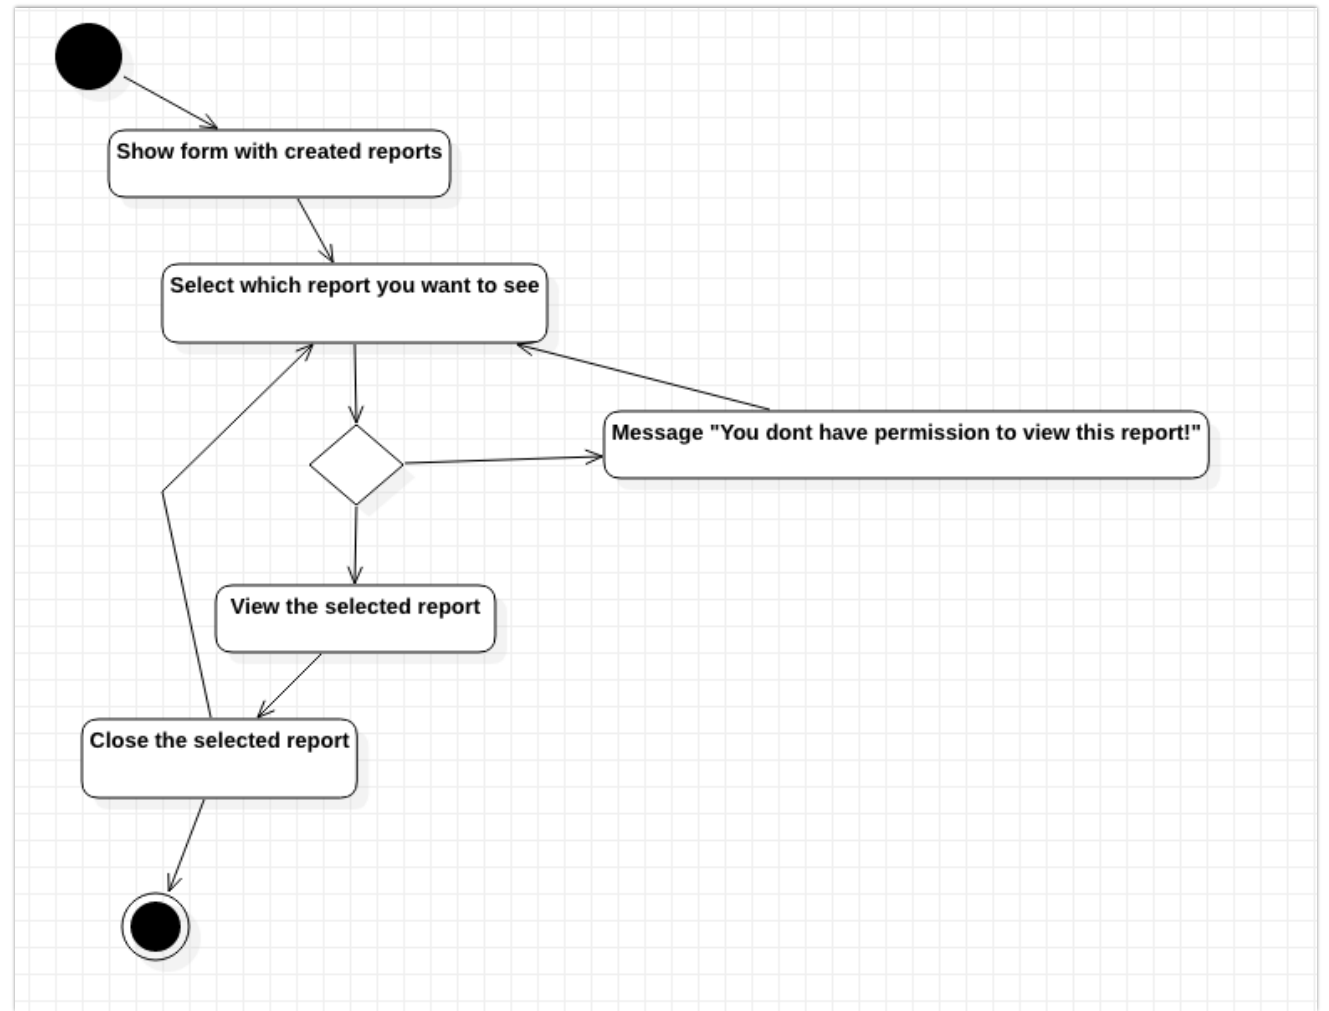

# Activity Diagrams for Delete

# Activity Diagrams for Edit

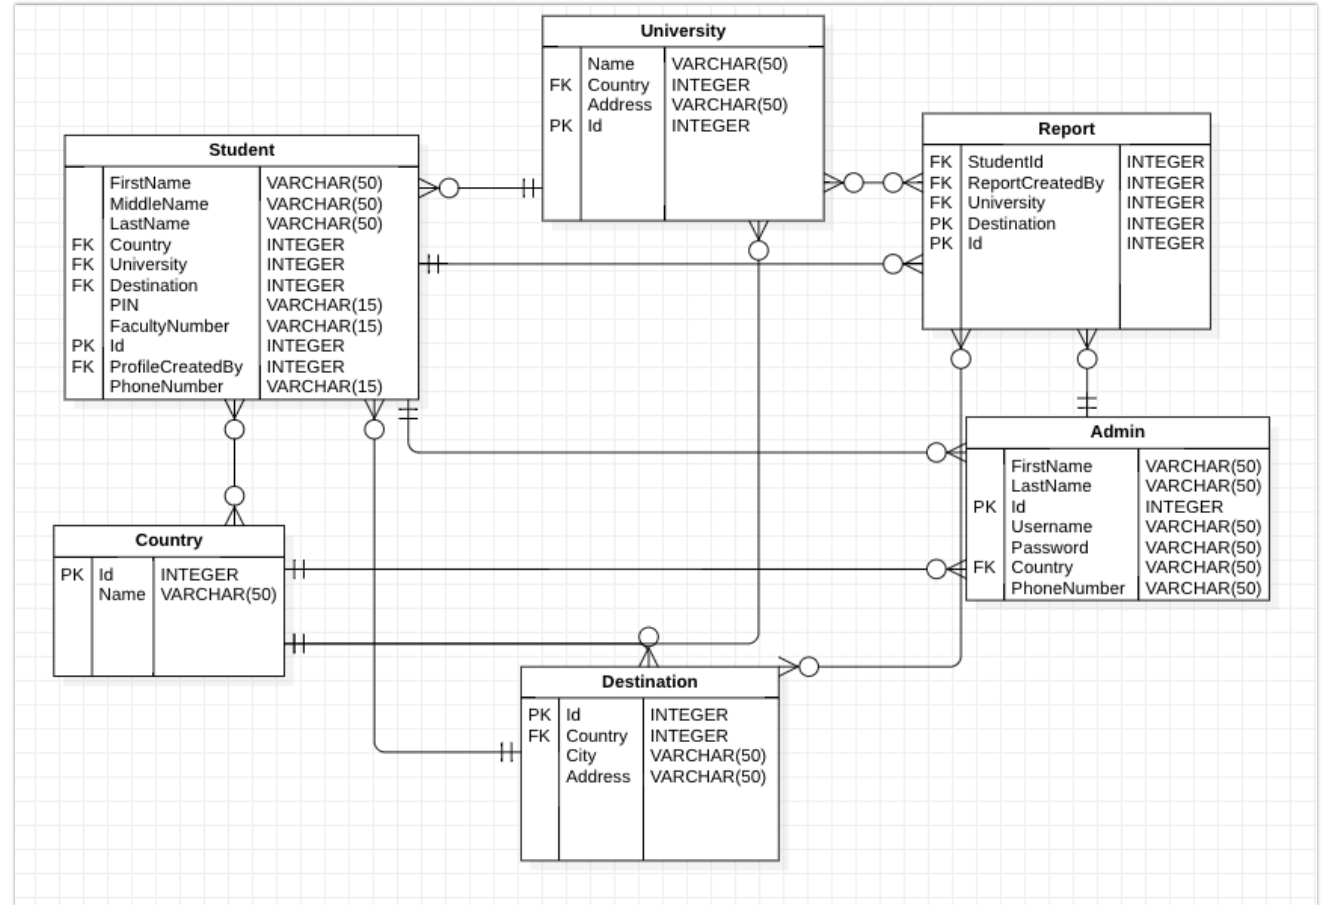

# Activity Diagrams for View Report

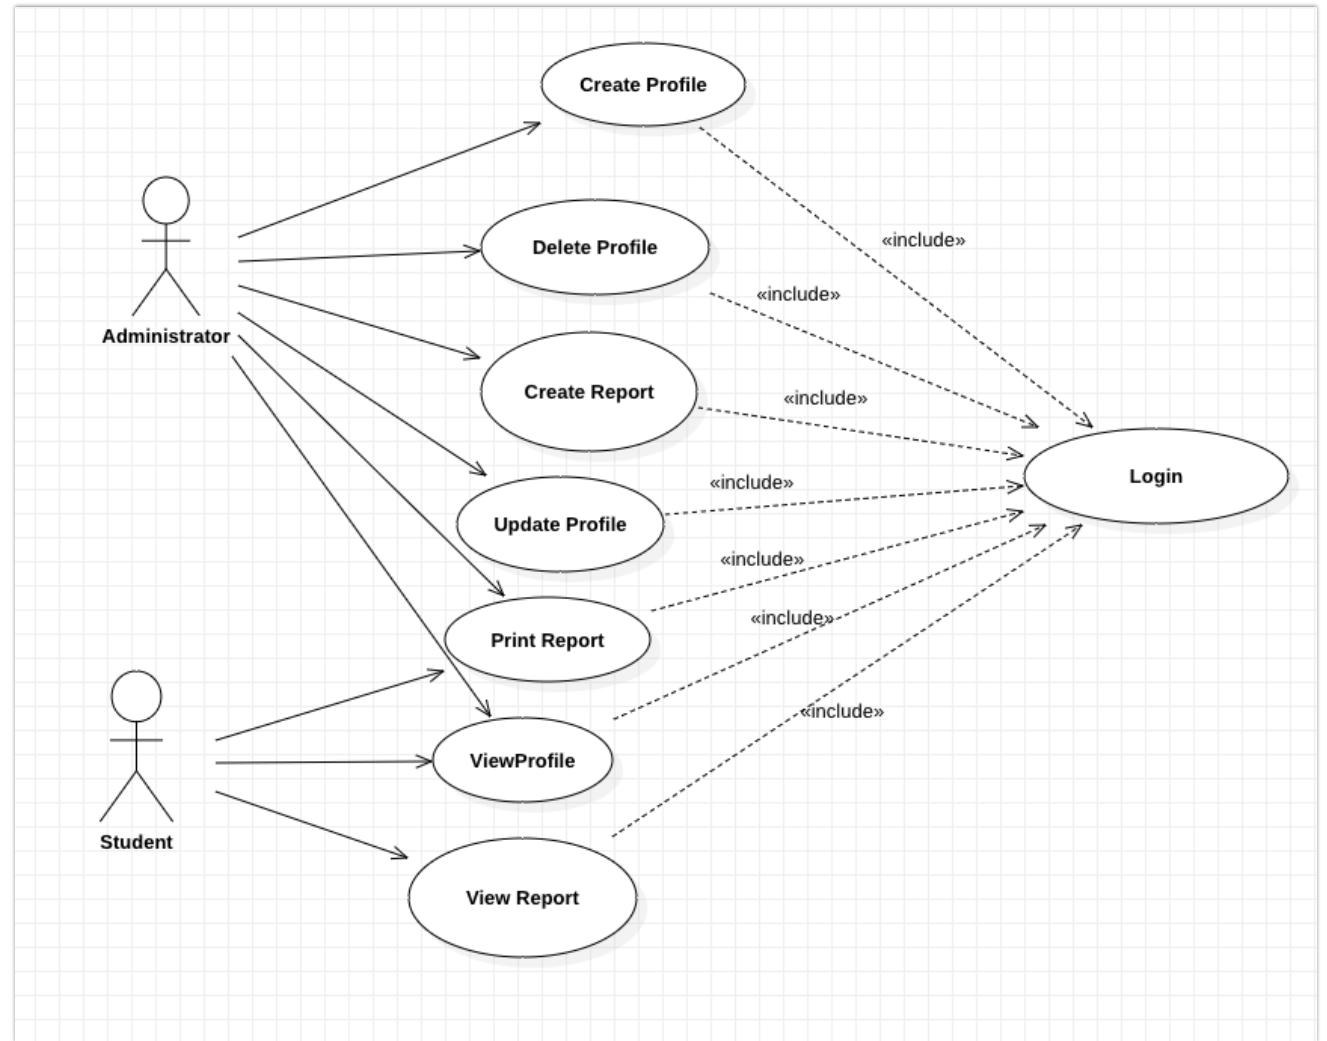

# Entity Relationship Diagram (ERD)

# Use Case Diagram

Разработихме и  
прототипно приложение с  
основна функционалност.  
Снимките на екрана  
могат да се видят на  
следващия слайд.

The image displays four wireframe screenshots of a web application interface, arranged horizontally. Each window has a light blue background and a white title bar with standard window controls.

- Window 1 (Title: ERDB):** Features a login form with fields for "UserName" and "Password", a "LOGIN" button, and a "Sign up" link.
- Window 2 (Title: MainForm):** Features a main menu with buttons for "ADD STUDENT", "SEARCH", and "LOGOUT".
- Window 3 (Title: SignUpForm):** Features a sign-up form with fields for "First Name", "Last Name", "Country", "User Name", "Password", and "Re-Password", a "SIGN UP" button, and a "BACK" button.
- Window 4 (Title: AddStudentForm):** Features an add student form with fields for "First Name", "Middle Name", "Last Name", "Country", "University", and "Faculty Number", a "SAVE" button, and a "BACK" button.

# Прототип на приложението

# Също така разработен Product Roadmap.
